

Rustage - Marines

{verse 1: coby (rustage)}

Yuh, ay, it's the pink mamba, the stick swinging like piñatas

Live larger, go up a notch like i script java

Thick armour, no admiral, but i spit lava

Ring master, sword repping like king arthur

Dropping in the arena

Big bodies like they alvida

A guppy, but not a feeder

I learnt it all from my teacher

I'm dominant with the heater

They coming to see the leader

I'm running with different features

From struggling being weaker

Hear my voice loud, way that i'm changing i polymorph, i'm not a boy scout

I get it done like it's rocky port, so keep the noise down

Act like helmeppo, i'm chopping boards

I may not be the cabin boy, but i'm still known to mop the floors

{verse 2: garp (jhbboss)}

It's the top of the marines, i'm way too high, they can't get up with me

Strongest of 'em all, no devil fruit, still they ain't touching me

Follow orders, nah, forget the rules, boy, they gon' follow me

It's greatness in the bloodline, you can not run with monkey d

Try to name me somebody who is meaner

Shoot shots and fade in all white, boy, i'm still cleaner

Do 'em like chinjoa, one punch turn 'em to a sleeper

Got socked, now he dropped like a pass to a bad receiver

Admirals thinking they hard in real life, they doing no damage

Haki body is too strong, no, you can't even manage

Making sure the whole team eat, opposition is famished

Smoke 'em by shooting two cannons bigger than half of the planet

{verse 3: smoker (dizzyeight)}

**High roller, your soul gon' fly high when i roll up
Gas 'em up, get puffed passed like chain smokers
Who gon' die? you all wheel like range rovers
Part his wig like my grain, no hangover
He say he want smoke, but can't match it
For the green, i'd turn him to a star like patrick
How i light him up, make him sick - how we light it up
You tryna fight, you gotta tighten up, i promise, you don't frighten us
Put you on defense
Why you playing with a shark on the deep end?
He got blood in the water, that's just ink spilling, we killing
Anyone stepping to the fleet get the feet sent**

{verse 4: aokiji (breeton boi)}

**Man's been cool, calm, collected
Any beef brewing, know kuzan prevents it
And who gon' contest it? (ain't no one)
'cause they know who the best is, never been bested
Sleeping on me 'till they get rested
Or arrested
But i don't even do that no more, nah, twelve is a dead ting
No longer invested
Them man sailing the seas, but me, i'm on a bike trip
Wrist so cold, it could change up the climate
The punk been a hazard, watch your step, or you might slip
They all want the ice 'till they know what the price is**

{verse 5: tashigi (anoravt)}

**Yah, ay, got the blade like assassins, i go rogue, ah
Watch the way that i'm slashing, i'm so vogue, ah
I can slain with no capping, that's no smoke
And i be taking names and making them worst like they zolo, uh
Out my way making space, i'm a heavyweight, ay**

Make 'em break, they can't take on my gentle blade, ay
You want cake, then your brain gonna separate, ay
Different stage of my game, that's a weapon's grade, yuh
I got silver on my side, bitch, i'm coming equipped
They let the blind lead the blind, but i'm cutting the mist
I may be pretty on the eyes, but i'm running the ship
'cause i be doing this so fly, on my butterfly shit
{verse 6: fujitora (shwabadi)}

Yeah, better watch who you talk to
Ever the stick waving whenever i walk through
Consequences are heavy, forget 'bout a law suit
Bit of a daredevil, but never in court rooms
Had to sever the sight, remembered when i
Saw malevolent intent of men and devils alike
Knew the system was infected by the venom inside
Until i fix it, never let myself die, so
Don't you misjudge the gravity, batter him when we battling
No chatting, it's fuck the flattery, flatten him out
Biggest ying up on my head, and i'm backing it out
Sink your ship if you think you could bring this admiral down, bitch

{verse 7: vergo (geno five)}

You looking lost at the sea, you on my turf
Say he got beef, but i bratwurst
He don't have the heart, you know i was corazÃ³n first
Attitude on kuzan, i'm the coldest on earth
Omelette, you can't hold a candle to me physically
If i'm getting egg on my face, then it's literally
They gon' scramble, know they can't beat me
He try and run, he know it's over easy
Real marine shit, i got 'em sea sick, i'm poseidon
I could never be anemic, my whole body iron
I can flip the switch, get your crew dead, ay

I'm a pirate with this shit, like a bootleg

{verse 8: kizaru (louverture)}

**Phosphorescent god with the drip your broad
Tryna kick y'all light work cons, in this bitch you pawns
Getting blitzed, should know that i'm a problem, in this bitch a don
With a gift that sees me shining brighter than any of the opps i'm against
It's fair to say there's no competition, they hate that i glisten
Y'all blinded by such greedy ambition, your crew full of bitches
I keep a lil' beam when i flash it, your dome get to split
Clowns throwing shade at my clique 'cause so luminous
Ain't hear me before, so i'm slowing it down for the jits
This the year i'm setting my plans in motion
Yata no kagami - how the moves is golden
And with my own fingers i'm causing explosions**

{verse 9: hina (saa)}

**One-two's come through with the hook like a stray punch
Crunch time, feed the whole crew like a lunch line
Bar after bar, made of steel, known to shake rust
Trust, jacket white, stay untouched 'cause i dress sharp
Drip tight
Hands on my whip or my ship as i zip right
Past get you clasped up, watch you act up
Captain captive! keep the cap off, queen stay trappin'
Yes, i'm livin' it up, lovin' my limitless locks
Let me just level with you, you won't be leaving this spot
He not ready, hina steady snatch bags like the villainess
And leave the cage match, nickle-less**

{verse 10: sengoku (connor quest!)}

**The boss man, everywhere i walk i bring a fleet
The top dog, keep his hounds on a little leash**

Not trigger happy, i stay mindful with the stick i keep
Jacket so big - i have to search for my inner peace
Where is the golden glows, you'll get a ward, not the golden globes
Before you fight the war, you best be sure that you can hold you own
Keep a corazÃ³n - that means silenced undercover
'cause when the waters are mudded, it's thicker than blood of brothers
Shoulda, coulda, woulda
Won't put a foot up to buddha
But what's it's all for the good of
The coat, don't come with the sugar
Hang it up to dry
Hope these sour tastes were justified
Trust my guys
But wonder how's it look from other sides

{verse 11: momonga (oricadia)}

Had to start it off, and i ain't get a squad to go
Speaking on my name akin to leaping off, geronimo
And splash on, you talking on my crew will get you bashed on
Headstrong, boa leave you frozen on a headstone
I said i got a problem, who gon' solve it?
Ay, ay, i said i got a problem, who gon' solve it?
Look, i see them snakes in the grass ain't no burying me
They had no breaks in this chapter like we buried enies
You hear a quake? that's a fleet, better get on your knees
It's rinse and repeat, you fuck with us, you die, i'm gone

{verse 12: aramaki (politices)}

Sakazuki mixed with aramaki - you get pe\$o pete
No matter how i'm moving, know that shit is only for the green
So this the path that you have chosen must be a mythical zoan
'cause when you saying you a beast, it became believe
Think you beating me? huh! pray and see

Mad your girl want my fruit, she pulling up to shake the tree
Promise, you're not like me, you ain't strong enough to take the heat
What you checking for, i check with fours, this shit ain't dnd!
Yah, man you ran outta luck
I be whitebearding these rappers, i ain't do it from love
Why they stepping to the clique, man
Straw hat think he all that photosynthesis, i'm taking power from the sun

{verse 13: akainu (shofu)}

Oh god, it's a catastrophe, moving with some savages
See defiance i'm ravaging, lollygagging ain't having it
Death and pain - i'm the catalyst, kill these pirates, i'm adamant
See fire fist, ace, my fist go right through his back again
I'm kidding around, fed to the hounds, the pirate king isn't crowned
See roger dead and now his kid in the ground, you get a round
Don't make a sound, i'm headed straight to luffy next
They trembling, they remembering every word that sakazuki said
Ain't new to this, really do this shit, stupidest who they lose against
Losing if i'm shooting, i pull it like who they fooling with
Akainu, trouble when i slide through
Catch a whiff of pirates, ain't no telling what i might do
