

Gravebirth - When Demons Lay Dormant

**Drenched in pain
As the rain pours from my scars again
I'm bottoming out again
I don't want to feel another second of this**

**No one else hears these thoughts I have at night
No one else hears the voice inside my head**

**How fucked in the head
Does someone like me have to be
To rid myself of this misery
That I've come to know and love?**

**No human being should feel what I feel
Hear what I've heard
Or see what I've seen**

**Everything's a construct of my diseased mind
I am alone inside my head
Trapped and left to die inside my head**

**So let my body be a godless church
Ancient and crumbling, cursed and haunted
This hollow auditorium of my chest
Is a cathedral of scar tissue
Oh well, this world then the next one
Oh well, this world then the next one
I can't wait for death to bring me life again
I can't wait for death to bring me life again**

The purpose of human life

**Is to suffer until you die
So may death come on swift wings
When demons lay dormant
Death takes human form**
