

Logy1 - Freestyle 2004

{Verse}

2004 I was born in my city

I made it one line to 150

Burns the system in my head like a calorie

I have no money but i can change my story

Money in my bag, I put it in the grave

I might jump then fly like two big waves

Can i move the camera like bill gates

Lil baby ever say every chance i get

I have slept all day keeping one control playing

Overcome this pain but I don't want to lose my day

Hate it when the two enemies always say and say

Told me there is no fear when they play what they say

Can i make one two one two

Turn math 1 plus 1 equals two

When the virus attacked I got the flu

I actually don't have any clue

Fuck all the bad times with the past tense

Bigger picture, it's not from my friends

When the people of the world see my dance

I can change the world and burn all my brands

Back in 2019 i got inspired to make a dream

Cinematic in the scene, I get good movement when I dream. yeah

What do i make, what do i take

Every day get bad or good i will wake up

Fuck your all motherfucking head up

I tried to scream while standing up

Back in the flow of maneuvers in the show

With a slow to fast tone that's what can grow

I can make a full bar quickly with the end slow

You can check the ringtone until they can say whoa
