

Derek Pope - Nothing Changed

{Chorus}

Too many plates gone

Fed all the fake ones

To the equation

Can't relate

Too many faces

Too many shapeshift

Gimme the basics

Nothing changed

Nothing changed

{Verse 1}

Just the way that they look at me in vain

Things are good but, shit got strange

Money eyeballed hearts'll change

{Chorus}

Too many plates gone

Fed all the fake ones

To the equation

Can't relate

Too many faces

Too many shapeshift

Gimme the basics

Nothing changed

Nothing changed

{Bridge}

What's the cost

Memories that I left in this vault

Makes me wonder if it's really my fault

All that pain and I never clicked the lock

{Verse 2}

Let's see

I remember every phone call right before we grieved

I remember getting passed on, each and every team

I remember out in Florida shipping zips of Cali trees

In a box of Fruity P's just so I could finally breathe

What's that make me

Barricaded my mind come and take it

Step inside, step inside, for your safety

Look alive when they look at you so gravely

Lately it's been hard to trust

There's no park bench when it comes to part of us

We went far enough, ain't it obvious

That the phantom all along in the audience
