

Gothic Psychology - Turn Around

{verse 1}

**And when we see each other
We never talk about what really matters
To find a way around
High speeds and fragile sounds
If you're feeling scared now
When you're uncomfortably fine
There's something that you can do**

{pre Chorus}

**Turn around
Turn around
Turn around
Turn around**

{Chorus}

**And don't be sad
I know you will
But I'll still be here
And don't be mad
Cause knowing you
I won't be here long**

{verse 2}

**And when we see each other
In a world that's upside down
It's a death by desert sounds
In an endless math equation
If you're still uneasy
When there's no color in the air
There's something that you can do**

It's that simple, me and you can do

{pre Chorus}

Turn around

Turn around

Turn around

Turn around

{Chorus}

And don't be sad

I know you will

But I'll still be here

And don't be mad

Cause knowing you

I won't be here long

{bridge}

When every step you take leads to your death

And the air is cold and stale, it's all in your breath

You'll find a friend in this hollow shell

Of what remains to be me

You'll eventually and finally

Find the strength in you to

(Stop, no, you have to stop)

{pre Chorus}

Turn around

Turn around

Turn around

Turn around

{Chorus}

And don't be sad

I know you will

**But I'll still be here
And don't be mad
Cause knowing you
I won't be here long**

{outro}

(STOP STOP STOP STOP YOU'RE HURTING ME)

(as if the system came of age then, friends come and go)
