

Rustage - FRIEREN RAP "TIME" RUSTAGE ft. Isa

**We change the lives behind us
The people fade, but memories stay
Through pain and strife it binds us, couse all we need is**

**Time ticking away at our bodies
The older we get than the shorter it seems time
Actions work better than sorrays
A bridge canÂ´t be built without water beneath time
Spend it all talking to me
Tied with a bond thatÂ´s been forge with dream
Fabric gets worn til its rotten debris
So the stitches and threads have been torn at the seams**

**All we want in lives to find a home
Searching for the highs before the lows hold em in the nights
You keep em close until they change to writing on the stones
Name and dates the sights that people know
Cant convey the mind beneath the snow
A thousand years i try to give em hope
When i look up to the sky, im not alone**

**Bring the sparks and the magic, put my heart into practice
See the stars and our planet, drifting endlessly through the blackness
I cant handle the damage, blood and tears on the granite
We got different mechanics, people speaking all the same language
Ive looked through the pages, the words that were written for me
Not fighters and mages just people that live for a dream
We change the lives behind us, the people fade but memories stay
Through pain and strife it binds us, couse all we need is time
All we need is time**

All we need is all the people like trees in the forest
Who'll be there when I'm lost in the morning
All we need is time

Minds a garden every thought a seed
Planting flowers and we're sorting weeds, shed our skin
Like the autumn leaves (nah)

Never changing up my core beliefs
Not the person that I'd thought I'd be
Become the light that they saw in me
We paint with our different brushes, I'm still trying to learn
What love is, mistakes and the hurt it comes with
Lost their voice but kept their luggage
We all have a view on justice, what ways of life that we must give
It's not weak to lean on our crutches
In our flaws we learn what to trust in
We don't live our lives in a vacuum
See us through our eyes and our statues, live for wants
But fight if you have to, laid to rest and die without thank you
Scars won't show the highs that we ran through
Grateful for the climb with each stab wound, we must be defined
By our values, show the world what time and love can do
I've looked through the pages the words that were written for me
Not fighters and mages just people that live for a dream
We change the lives behind us, the people fade, but memories stay
Through pain and strife it binds us all cause we need is time

All we need is time
All we need is all the people like trees in the forest, who'll be there when I'm lost in the morning (time)
All we need is time
