

## Gothic Psychology - Glass Hearts

{verse 1}

Telling the truth is hard in a world of lies  
And I can't even look you in the eyes  
And all you say is that I never try  
But we're just trying to get by

{preChorus}

Why do I get stood up on every date  
I'm starting to think she's not just late

{verse 2}

If you could just hear this song  
You'd naturally sing along  
It would come to the masses  
And spread the cracks and flaws

{preChorus}

And I never meant to do this  
I only want to feel the bliss

{Chorus}

All for me you break my heart  
Like broken glass from the start  
And I only want to know you better  
As nothing I do can change the weather

{verse 3}

So let your skeleton out the closet  
Go and drain all of the faucets  
And you disappear very often  
Nothing left for the winner

**{bridge}**

**Glass heart cold world**

**Your life my pain**

**The start and end**

**The path the trend**

**You see I feel**

**I live you die**

**And we will never be together**

**And you broke it forever**

**{Chorus}**

**All for me you break my heart**

**Like broken glass from the start**

**And I only want to know you better**

**As nothing I do can change the weather**
