

Lucas Grabeel - You Were My Childhood

**We grew up way too fast
Missing who we were yesterday
How that we've become the past
Starting new was something I used to say
But no matter the weather
We're All in This Together**

**You were my childhood
Took the bad and made it good
When times fall dark
You made me reach for the stars
You told me I'm enough
All we need is love
You made me believe
You are the music in me**

**My childhood
My childhood
I finally found
What I've been looking for**

**You have always been right in front of me
No matter what the score
The buzz, the hits with us
Breaking free
Oh the red, white and gold
Will never grow old
You were my childhood
Took the bad and made it good
When times fall dark
You made me reach for the stars**

**You told me I'm enough
All we need is love
You made me believe
You are the music in me**

**My childhood
My childhood
My childhood
My childhood**

**No matter the weather
We're all in this together
As the red, white and gold
We may grow up, may we never grow old**

**You were my childhood
Took the bad and made it good
When times fall dark
You made me reach for the stars
You told me I'm enough
All we need is love
You made me believe
You are the music in me
My childhood
My childhood
My childhood
My childhood**

Thank you for being my childhood
