Gothic Psychology - Sad Song

{intro}
Your not just killing yourself
Your killing a part in everyone who knew you

{verse 1}
And when you tie it around your neck
I hope my voice will find you

{Chorus}
And even though I know
You may not hear this In due time
I hope with every life gone
Well find a way to save many more

{bridge}
It's all the same, It's all the same
It's all the same, It's all the same
It's all the same, It's all the same
It's all the same, It's all the same
It's all the same, It's all the same
It's all the same

{verse 2}
Throw me out and say
What you wanted to say
I'll be okay if it's what
You really want
{outro}
And even if I'm not around
You'll have this song
In every cloud and shooting star

My ghost will be where you are
