FoxWithGuns - Error:302

{Intro}

Cycles of cycles, trapped inside a maze

I didn't want you anyway

Mirrors of past and future parallels

I cannot hear a word you say

{Chorus}

Watch what you say to error 302

I miss when I was made of you

Put down the phone with static on the line

Maybe the truth was out of view

{Bridge}

Software error, software error

Software error, software error

Software error, software error

Software error, software error

{Verse}

So one more thought for the ones that I need

Can't handle now, clocking out early

Disconnect from the world, pausÐµ all around me

Can't hear myself ovÐµr what I see

It's reality's end, where the fiction begins

And the writers lose track of the script again

I'll see you soon, of this, I'm sure

But you can't put a stop to the transition

{Chorus}

Watch what you say to error 302

I miss when I was made of you

Put down the phone with static on the line

Maybe the truth was out of view

Watch what you say to error 302

I miss when I was made of you

Put down the phone with static on the line

Maybe the truth was out of view

{Outro}

(302, made of you, 302)

Put down the phone with static on the line

Maybe the truth was out of view

Watch what you say to error 302

I miss when I was made of you

Put down the phone with static on the line

Maybe the truth was out of view
