

Foxfredito - Whisper

Your laughter's like music, and Your melody so sweet
But lately, there's a distance
A rhythm we can't meet. I try to chase
The silence, find where it begins
But your eyes tell a story, hiding deep
Maybe it's just my mind playing tricks
Or maybe there's a secret
That you know you can't set free
But whatever comes our way
I'll be here to stay
Girl, we will find our way
Girl will conquer it all

(Chorus)

Oh I love you, girl
With all my heart
But there's a whisper in the dark
Something's changing I can feel it now
But I'll hold you close and tight
Every morning I wake you by my side
Your smile lights the room, it feels so right
We dance through the day, just you and me
There's a shadow lurking, something I can't see
With love as our compass
We'll make it through the night
Though the road gets rocky, shadows fall
We'll find light, and conquer all
Just can't shake something is a miss

(Chorus)
