

Rustage - AVATAR ft. HalaCG

{Rustage: Verse 1}

They know my name, my face

They say I raised the stakes

I got em talking even in the walls of Ba Sing Se

Light up, I'm changing state

I'm one to play with fate

Just like the Earth Queen, how I'm gonna take their breath away

Done with hearing their offers

Send em back again like I'm Sokka

Any captain seeing who's stronger

Man like Zuko, talking about honor

I gon do the moves that you wanna

Breaking backs and changing their posture

We ain't even on the same genre

You are not apart of my roster

They wanna move, send a round like pebbles

I gon bend they metals

Iroh flow, gonna blow like kettles

Moving blood and vessels

Lords getting brought down to my level

Move the ground, they tremble

I'm so fly like bison

Been the greatest from straight out the temples

{Pre Chorus: HalaCG}

You and me, live in breathe in my element

Never fall, give it all, we're accelerant

Inner state, I create, you're irrelevant

Intelligent regiments, stay away they know better than messing with me

{Chorus: HalaCG}

Jumping in now they're out of luck

And they search high and low, there's no catching us
Start the fire, shake and quell
Yeah, we've got this far
Grab my hand, join the team
I'm the Avatar (x2)

{Verse 2: Rustage}

Standing tall on my own feet
I be moving like I'm a pai sho piece
I got fans on me like I'm Kyoshi
Know why Raava saying she chose me
Keep on talking down in the library
Cause their knowledge base is below me
I'd be redirecting their lightning
But don't see a spark when they show me
Ay, leave white like Suki
Ay, king of rock like Bumi
I'm a thing of beauty
You're more like the movie
You must be on cactus juice cause you be moving looney
I gon move like Varrick move and do the thing like Zhuli
Might ty the leed, but rather show I've won it
Like I'm Azula, and this track gon be my Sozin's comet
Unalaq, converge my bars until the flow harmonic
And I gon leave em like they Aang, they looking frozen solid

{Chorus: HalaCG}

Jumping in now they're out of luck
And they search high and low, there's no catching us
Start the fire, shake and quell
Yeah, we've got this far
Grab my hand, join my team
I'm the Avatar (x2)

{Verse 3: Rustage}

**We talk of balance, but we're testing all our limits
And I hope with all our talents, prove we're men and not statistics
From the earth we light a fire with the elements we're gifted
And we keep on wearing masks, but there's connections in our spirits
I've regretted being timid, I'm not resting till I'm finished
Feel the air within my lungs
With every breath that I've been given
It's a legacy, an image
Every lesson, I exhibit
Cause I'll keep on making waves, so I can tell them that I did it**

{Pre Chorus: HalaCG}

**You and me, live in breathe in my element
Never fall, give it all, we're accelerant
Inner state, I create, you're irrelevant
Intelligent regiments, stay away they know better than messing with me**

{Chorus: HalaCG}

**Jumping in now they're out of luck
And they search high and low, there's no catching us
Start the fire, shake and quell
Yeah, we've got this far
Grab my hand, join the team
I'm the Avatar (x2)**
