

dylAn - Earthly Star

Hello

Hello my earthly star

(On the moon)

On the moon

And I'm landing where you are

We can go

On earth

Where the trees and grass they grow

We can take it slow

Hold my hand, don't be afraid tonight

â€ˆCause the moon, in the water

Yeah it shines

(It shines, it shines)

(It shines)

(Aye)

Hello my earthly star

Sure it's different where you are

We're one in the same

You're my best friend now, today

(Almost in the desert for Coachella baby)

I know what you like

(Almost there ya'll)

I know what you like

I know

(Thanks for subscribing)

I know

I know, I know, I know

Posted by the cactus, with a cigarette

Out of this world intelligence

Said she celibate

Feet in the grass

Sunshine

You can tell it's lit

Never felt this before

Came to earth to get a kiss

(Tell me, Why I, can't, go live without you)

Never felt-

Never felt this feel before I came to earth to get a kiss

(Tell me why I can't just live without you)

Want a taste

(Tell me why I can't just live without you)

(Tell me why I)

Aye

Extraterrestrial soulmates

(Tell me why I can't just live without you)

(Tell me why I)

Tell me

Why I
