

hxikai - through the night

{Intro}

hxikai

{Chorus}

i'm riding through the night, I'll be just fine

i'm riding through the night, I am alright

i'm riding through the night, I'll be just fine

i'm riding through the night, I am alright

I've been contemplating and not conversating

I'm just devastated every conversation

They don't understand how it's hard for me

And you'll find someone new, I knew I wasn't for you

And I don't wanna see you

And you don't wanna see me

And I've been thinking how life would be

If you never met me

Sometimes I lay in my bed

And getting up is something I dread

I still remember the things you said

So don't talk to me just yet

{Chorus}

i'm riding through the night, I'll be just fine

i'm riding through the night, I am alright

i'm riding through the night, I'll be just fine

i'm riding through the night, I am alright

{Outro}

i'm riding through the night, I'll be just fine

i'm riding through the night, I am alright

i'm riding through the night, I'll be just fine

i'm riding through the night, I am alright
