

Craig Scissorhands - FROWNY FACE

{intro}

I don't feel so good

Make me feel like i would find me out in different ends

You tried to make that happen everyday

{Chorus}

Spent awhile by myself just figure it out

You feel like every day would be better without you

But know that it's true

Spent awhile by myself just figure it out

You feel like every day would be better without you

But know that it's true

{verse}

(you know what you did, you didn't care from the start)

I guess i'll go outside and sit in the dark

Every day i feel farther away from you

End it all, end it all, nĐuck myself with a noose

I'm on the Đudge of the roof, and they don't care what i do

I might just jump off the edge, they'll take me to you

{?}

{?}

Someday i will figure everything out

I was chain to the dark, {lemme look at them all}

{?}

Everybody at once still let me know

{Chorus}

Spent awhile by myself just figure it out

You feel like every day would be better without you

But know that it's true

Spent awhile by myself just figure it out

You feel like every day would be better without you

But know that it's true
