

## **Sewerperson - Its inevitable**

**Weather warnings fill up my phone  
I pray she had made it home safe  
I choose walk slower in this heavy rain**

**I made a pact with the devil  
He told me Im destined for damage  
Most of my scars in my mental  
I told him I think I could manage  
He never prefaced the heart break  
Right in this moment my heart aches  
I try to think bout the words to say  
But out of my mouth comes toxic waste  
Up in her nose its bumps of yayo  
She gon keep going till she wear a halo  
Im out of papers I hit the volcano  
I spin my corona and drink a tornado  
She said coddle me baby  
Maybe this world was a failure in making  
7pm in hawaii im distant  
I read the text but I told her I missed it  
Last night  
At Last call  
It Felt like  
A century  
And I hope  
That u know  
Exactly what that meant to me  
I pray  
We cross paths  
Again in life  
Eventually**

And I hope  
That u know  
Exactly what u meant to me  
Walks home  
In streetlights  
In august weather  
Haunting me  
I look up  
At satellites  
Inside this field  
In berry  
I star watch  
Bus routes  
And late nights  
U act to captivate me  
Our good byes  
In porch lights  
Still have me day dreaming  
Whos bed are u in this evening  
And If yours u could come join me then  
We cut ties but were still not bleeding  
In the next life I will love and meant it  
Forest on my walls  
I have moss on my eyelids  
I can't help but smile  
When I burn down my environment  
I made a pact with the devil  
He told me Im destined for damage  
Most of my scars in my mental  
I told him I think I could manage  
He never prefaced the heart break  
Right in this moment my heart aches  
I try to think bout the words to say

**But out of my mouth comes toxic waste**
