

Sewerperson - Goodbye

If i told u what was wrong i know it would go left
If i preach to the choir i would be tone deaf
This was not what i desired or what was promised
You've been using me to frequently as an object

In these hard times
We can still have a good time
Without sunlight
Still ur face had glown bright
Oh my god
Im in such a love triangle
In my field of view
I see doves
Take back the words i spat out when i was mad at you
Id still take u back regardless of the lies u told me too
I guess when im in love i tend to act a fucking fool
If u need a helping hand that badly im ur fucking tool
I just see red
My baby i just see blood
I walked in on you two
NakĐud body mid fuck
I guess i love you too
Was nevĐur something u meant
I pray u keep getting by
On all these lies u attempt on me
Now
I can't feel at all
Lately
My whole bodys numb
I had just sealed my fate
Rolling off this molly bump

I guess

I just called some people i should never been called at all

Maybe

I guess people like me dont change after all

In these hard times

We can still have a good time

Without sunlight

Still ur face had glown bright

Oh my god

Im in such a love triangle

In my field of view

I see doves

Take back the words i spat out when i was mad at you

Id still take u back regardless of the lies u told me too

I guess when im in love i tend to act a fucking fool

If u need a helping hand that badly im ur fucking tool
