

Gentleman - You Remember

Chorus:

(You remember) When we used to write letters and we never used to send text messages

(You remember) When there was no Facebook, no Youtube, never invade the colleges

(You remember) That technology's a good thing but many misuse it and cause peer damages

The future is so great we can't forget the past

I'm passionate about this memory, I got this feeling

Question to the leaders and me ask them what them dealin'

They say that the world need a spiritual healin'

What about the youth that we leavin'?

Cyberspace take their mind only that them a believe in

The elders get bitter so them stop from teachin'

Miles from the youth than how you ever reach them

Tell me how you ever reach them

Bridge:

We remembering the past but if there wasn't the past just remember that the re wouldn't be no future

So I say it with all costs on your behalf just like how Christ died for the youths, ya'

That's just a moment in time to mesmerize your mind you better acknowledge the truth, ya'

If your objective is crime you keep being unkind then your own weapon will shoot ya'

Chorus:

(You remember) When we used to write letters and we never used to send text messages

(You remember) When there was no Facebook, no Youtube never invade the colleges

(You remember) That technology's a good thing but many misuse it and cause

peer damages

The future is so great we can't forget the past

Certain good things happen in the past

Now everything change, everybody move fast (move fast)

And the youths, me see them act like them lost

Everybody wanna' be a rebel without a cause

You remember when we coulda' hence out

And a roll down south everybody coulda' roll all about

Now the tension so high like it want touch the sky

'Dem a plan now, fi try get you out

Mannerism is depleted, the past is deleted

'Dem fi know life's more than a flaas

And the children used to listen to the teacher

Now the children 'dem a gwaan like 'dem a the teacher of the class

'Dem used to say thank you and good morning

Now not even question a ask

But you can't blame the youth cause they don't know the truth

There is no one to help 'dem stick to the task

Chorus:

(You remember) When we used to write letters and we never used to send text messages

(You remember) When there was no Facebook, no Youtube never invade the colleges

(You remember) That technology's a good thing but many misuse it and cause peer damages

The future is so great we can't forget the past
