

Natas Loves You - Got To Belong

Stop trying to create the future

You find the present has a way to live this up to the ground

If you let it all go, when was the last time you felt anything?

I want you to shout with ----- joy

Related to ideas that barely exist

Because they are coming in package, you just can't resist

Created the myth will, never be a part of made us want to burn all around us

Fighting fire with fire the life could be much brighter

Fighting fire with fire dont you know where we've got to belong now

Chasing ghosts of lives to come ---- on and on

How about the life you are in why did u have to keep me in

I wonder why these open doors leads to be open ooh, its just a feeling i know

You know absolutely 'cause

We've got to belong

Fighting fire with fire the life could be much brighter

Fighting fire with fire dont you know where we've got to belong now
