

Jaden - 4 My 1

{intro}

She knows, she knows

She knows, she knows

That when she wears very little make-up

I can see you smile

You have been a wild child for a while, baby

The black and white is tiles, got me for a mile

Landing on my high notes, falling into cycles

The macros and the micros

I can't feel you through them tight clothes

But, i can feel your love it might grow

â€”angelo is after michael

Baby, you can be my sistine

Sixteen...

{hook}

You're all i need, you're all i need

You are all that i needâ€”oh yes indeed

I'm on my knees, i'm on my knees

I am on my knees, oh yes indeed

{bridge}

The funny thing about life is

I forget it when i write this

Getting famous from my high kick

Tell you what's right there

Nevermind that's frightening

Then i strike like lightning

I write, then i light them

Won't say it again

Sayin' i'm famous we flying to vegas again

And they say that they pay for this

If your okay with them taping this
Man, i'm debating this

{verse}

I didn't grow up an atheist
But man it gets so clear who's satan is
And man i'm not doing your interviews
Cause cnn doesn't have better news
I do all the things that i said i'd do
Open your eyes i'm ahead of you
L-e-x is the avenue, i will not stop until i am incredible
The center of all your attention
Is me when i'm in the room with my center fold
Imma go with me to ireland
I would just be so surprised if your crew was just eligible
Well i just put my whole clique on a pedestal
Kick it with models but sleep in my bed alone
Young upper echelon
I stay with my clique like a metronomeâ€”click
Had a few friends at the crib
And the popo came through to come shut down the festival
Had a new chick at the crib she respectable
That's unacceptable, give her flowers ahead of time
She said that she go to pepperdine cryin' at 9am
"homie, i said i'm fine"
She said she hate when i'm in her mind
'long as i make it to dinner time
Then i can ball out, then we can fall out
What is you talkin' 'bout? what is you talkin' 'bout?
I'm talkin' 'bout reading a book up in london
And walking around 'till it's dark out
That vision i saw it now, i'm not a scientist
Go read a hieroglyph, go stay where osiris is

I'm clearing my sinuses

{hook}

You're all i need, you're all i need

You are all that i needâ€™oh yes indeed

I'm on my knees, i'm on my knees

I am on my knees, oh yes indeed
