

## **Jaden - Offering**

**{intro}**

**We're gonna jump right into this one...**

**Checka, uh-huh uh-huh**

**Whecka, wh-wha, checkaâ€™bucka!**

**{verse 1: jaden smith}**

**What's a heart broken?**

**You see her and you start choking**

**A dark open room, will tony stark open the door?**

**Hoping, he'll take you out of this mess**

**Ain't no way that you gon' live another day with this stress**

**But god bless, you walk and talking and you got flesh**

**You so fresh, you heal the world with singular steps**

**I got next, i don't need to talk to my reps**

**My star trek's lastin forever, i'm breathing like the weather**

**Me and you together, these are bonds i'd never sever**

**I am james bond, what's going on? it's very clever**

**Top secret, drug bust, the cops keep it**

**The streets weepin, and the ones at the top see it**

**Grey cement, tree saps seeping the baby teething**

**That's the city on the weekendâ€™screw the planet, leave it**

**Interstellar, before i was into stella**

**Into hella odd future videos before i had a vimeo**

**'fore i was in the city with my bros, wearing silly clothes**

**This how the story goes**

**You know i'm gonna tell you all the truth**

**That's why we inspire the youth, that's why it's so important**

**That's why i said no to those endorsements**

**That's why i let my friends buy the porsches cause people at our doors hidi**

**ng out in trojan horses**

**That's why we got these torches, last thing i want is corpses**

But the thing that really bothers me is when these corvettes  
Pull up to my doorstep and tell me something corporate  
About my dang foreskinâ€™man, shut up  
My family's not a circus  
I told my dad to move the whole tribe down to europe  
Where there's less siri and a little more syrup  
Maybe the doctors there'll know how to cure us  
Maybe they are less serious, maybe they're different  
Maybe they don't think we're delirious  
We'll be close to the pyramids, we'll make a stop at giza  
Until they say we need you to renew all of your visas  
â€™wait dad, you told me we were born on planet earth'  
My dad said, "to beat the system, understand it first"  
My dad's an inspiration, i respect the man at work  
And everything you say is something that you can't reverse  
Something that you can't rehearse  
Someone that you can't converse with  
Like your clean pressed shirt, mess it up; wasn't on purpose  
I am a rhythm surgeon, sorry i am insurgent  
Divergent; zoÃ« get on the phone, it's urgent  
No furnishing in the crib, just burning my fists  
Tryna figure out what life is, i didn't write this  
How do you like my high kick, pass me the ball, i'll spike it  
Really likin this nitrous oxide, give it to me until i'm cockeyed  
Got my spinach now i'm feelin like i'm popeye or pappy  
I don't know, get at me, i'm outro  
{bridge}  
Uh-huh, uh-huh, uh-huh, uh-huh, uh-huh, uh-huh  
Uh-huh, uh-huh, uh-huh, uh-huh  
And shout out to myâ€™shouts out  
Uh-huh, uh-huh, uh-huh, uh-huh, uh-huh, uh-huh, uh-huh  
Uh-huh, uh-huh, uh-huh, uh-huh, uh-huh, uh-huh

{verse 2: jaden smith}

Renegade, never been afraid, sippin lemonade

Flew to france, sip in different ways, serendipity

Do you ever struggle with your enemies?

Try to conjure energies?

Try to lay a finger on my inner chi, prana

Say what you wanna, i'm onto the next

I'm a new male madonna, you too worried bout them checks

Can't keep a shirt on em in the zone of flex

But what about respect?

I'm just too busy to checkâ€™lex luthor, kamasutra

Come on, i don't care, leave that stuff to obama

Screw yo commas, let my sentence run on

C02 emitting until our damn sun's gone

Now who's your number one, huh?

Aye, who's your number one, huh?

Aye, who ya number one, huh?

Who's your number two?

Ditto, spit you the truth for real though

Tooth fairy under your pillow, camarillo

I don't listen to you, i listen to willow

The ether come out ya speakers, you got a problem?

Speak up, before the teacher leave ya

Red pants dancing with the devil won't repeat theâ€™

Last century, evolution probably mention me

Penitentiaries, they filling up, that's why they killing us

Probably see the flaws in the matrix if you real enough

Tried to keep it basic but the doctor's always pilling us

You even know what penicillin does?

Me either, i am the beat eater

Peeta from hunger games here to bring the funk again

Jaden's alter ego probably jumping in

If it's fine with you, we rendez-vous at 10

Walk up to ya crib with condoms in my hand  
Man we chilling with the kids  
They cause some problems in the sand  
And all because i told them god was not a man  
I love you so i'll probably carve it in my hand  
The cycle's over, won't restart it once again  
Won't restart itâ€™beat cold; flow, it's so retarded  
Burning coal just to gain control, homie i got it  
Young prophet, come out of pocket  
Just to see the geo-engineering stop it, we are boycotting it  
Went from picking cotton to be poppin on the rocketship  
And now we got the magic  
And we frickin harry potter on these jokers  
And whatever you be droppin, i ain't coppin it  
Cause i'm tryna make sure that my kids will have some oxygen  
When they land,you guys won't understand  
"daddy, could we fly?", i never could but you probably can  
And you guys are outta hand  
Just look at what's in your hands  
Saving the world is my obligation, it's not a plan  
But i'll do what i can and i hope i don't die from a lie  
Before i can get y'all to understand  
Understandâ€™and ride out to this man
