

Armand Van Helden - Still In Love

**You have been through
What I have been put through before
Now it's out of control**

**I feel the fire breakin' out
As I summon to the ground
I feel my heart go
Ooh, out of my control**

**I feel the tempt to turn you out
As I travel underground
I see this trouble all around
I have to let you go
I wanna let you
Take good control of me
I feel the fire
Comin' in out of me**

**You have been through
What I have been put through before
Now it's out of control**

**I've been over you, you've been over me
I don't know what to do, I'm still in love with you
I've been over you, you've been over me
I don't know what to do, I'm still in love with you**

**There's a question I must ask
If you travel through the past
Could you change for me?
How different would it be?**

**Would you love me more or less
Could you handle all the stress
That I put you through
I don't know what to do**

**I wanna let you
Take good control of me
I feel the fire
Comin' in out of me
You have been through
What I have been put through before
Now it's out of control**

**I've been over you, you've been over me
I don't know what to do, I'm still in love with you
I've been over you, you've been over me
I don't know what to do, I'm still in love with you**

**I've been over you, you've been over me
I don't know what to do, I'm still in love with you
I've been over you, you've been over me
I don't know what to do, I'm still in love with you**

**I've been over you, you've been over me
I don't know what to do, I'm still in love with you
I've been over you, you've been over me
I don't know what to do, I'm still in love with you**
