

Rustage - Madara

|verse 1: rustage|

Uh, got the vision, i be on the mission

They been living life like it's a contradiction

On a competition read the job description

I be breaking armies like it's long division

Call me madara, ay

Drop jinchuri, i'm the armada, ay

Looking wooden like they hashirama

I'm gon' read their mind like i'm the guarding that, ay (you lotta know about the)

Dropping planets like a sleeping atlas

God has planned, he's don't need a raptures

Body language, they gon' see the patterns

Took a peep at writings like it's read of rabbits

They gon' see the matters, took a whole army

Took a lead of actions of a whole kami

You are wreathing at me, keep a pole on me

I'm gon' keeping balance, fire talking like i spit with dragons

|verse 2: shofu|

Fire on me, know i keep it ratio

When the beam attack, you see the demon faction

I won't bleed again

As you don't want to talk, and we don't need the stretch

It's no games, you seeing disaster, sharingan

He move, we move, see moves like clear patch

I be me, what you thinking back?

You speaking fast, the god shinobi, i don't need no raps

Rinnegan, people die when i activate

Drop tools, got plans to reanimate

Or we don't appalled, i bijuu the bomb

I'm reborn, i'm on the kill shit, i'm gon'

I flame shit - katon, got the legendary bloodline
Must fight, izanagi on your friend lines
Now we up like genjutsu, plus i
Hidden in the leaves, coming back for what's mine

[pre-chorus: jhbboss]

Cause a planetary devastation when i'm stepping up
Fire spitting, yeah, that's how i did it, know i'm different, no comparing us
See i'm repping when i walking up, susanoo hard body, you couldn't touch
Shinobis knows me when i stepping up, wanted the feel when i'm in the cut

[chorus: jhbboss & rustage]

You wanna war that's for sure, i'm upping the score, you know that i taking
'em out

Don't wanna die by the sword, abide to your lord, i'm leaving 'em deep in t
he ground

Rinnegan on me - it's course, i keep me a torch, he talk, then i'm burning
'em down

I'm finna straight to my core, i'm hunting for more, you know that it's dea
th when you hearing that sound - grrt bow!

[verse 3: rustage]

Uh, send goons to the sediment, uh

Man wounds on the medicine, uh

Man knew when i went through

We all failures of a senju

Made experiment, uh

I be acting like the avatar - way that i cognate elements

I wanna six like the hexagon

I turn a man red like i'm crossing with [?]

[verse 4: shofu]

I need that man dead - that's how i do shinobi

Tan out ten tan - the tool is on me, jutsus holy, infinite tsukuyomi

You be seeing the moon's eye
On point like kunais, you try
You try to try, don't get hook tries
Fool mind, you died, need a new guy
Opps get smacked like a fruit fly
Edo tensei, need a new life

[verse 5: rustage]

They know i'm grown in the war time
They can't smoke, let it spoke with exhaust, i'm
All on my own i can cause that swole time
Blow after blow on the floor like it's four time
Then they gon' torn light, and they all five
But the sword might cut a short life
What i brought eye got a foresight
To leave ninjas like a torn guy

[verse 6: shofu]

I say outside was the wrong side
I play both sides, and they all die
No life, i left no suns
I wakes no times, i use small fries
Throw signs, i got all kinds
I watch hope die with my own eyes
And i won't die for my war crimes
I turn your guys in the yokai

[pre-chorus: jhbboss]

Cause a planetary devastation when i'm stepping up
Fire spitting, yeah, that's how i did it, know i'm different, no comparing us
See i'm repping when i walking up, susanoo hard body, you couldn't touch
Shinobis knows me when i stepping up, wanted the feel when i'm in the cut
