

dylan - Death on Earth

**Mother I'm scared of all that we've become
Father look down as we burn beneath our sun
Lessons I've heard shouted round my world
But no one would save that precious little girl**

Death on Earth

For the will of man said it's so

Death on Earth

We would eat our children whole

Death on Earth

We called the darkness our own

Death on Earth

We burned our mother and hope

Maybe it was us that called the killing right

Needless consumption here has birthed an end so nigh

Lay down let it happen it's too hard to stand and fight

To save her from greedier hands that would rather watch her die

Death on Earth

For the will of man said it's so

Death on Earth

We would eat our children whole

Death on Earth

We called the darkness our own

Death on Earth

We burned our mother and hope

Mother I'm scared of all that we've become
