

RONDÃO - The Light

**I saw the light
And i should've seen it coming
It was dead in the night and so cold
I traveled back to the place where our love lies
'cause i never could do as i was told**

**I never knew all the weight i could carry
So i tried not to go back again
I was afraid to see light in the darkness
But then you showed me you were a friend
I should have known
I could turn it around
I should have seen
All my worries and doubts**

**I saw the light
And i should've seen it coming
It was dead in the night and so cold
I traveled back to the place where our love lies
'cause i never could do as i was told**

**I never knew all the weight i could carry
So i tried not to go back again
I was afraid to see light in the darkness
But then you showed me you were a friend**

**You showed me home
Is a place in our hearts
That i'm not alone
When i'm lost in the dark**

I saw the light

And i should've seen it coming

It was dead in the night and so cold

I traveled back to the place where our love lies

'cause i never could do as i was told
