

Rustage - Dreaming On

{intro}

**May have been lost, but now we've been found
Finding a footing with drops on the ground
Keep our heads up, and we can stay proud
Never stop dreaming on**

{verse 1}

**Ever since i was a kid, i never stopped dreaming
Even in the hardest times, i never stopped feeling
We all struggle with ourselves and say we've got demons
But being loud is always better than us not speaking
I been beating down, but snap it back like a rubberband, like a dinner - ho
w i'm honing planks
Hands shake when we meet up, but i'm giving hugs when i'm coming back
Turn thĐµ page like a fliporama - how i captain this on my other pants
Always thought i'vĐµ been given answers, but i'm playing life like a button mash
So they don't see the work and love i put in everything i make
And though it seems to hurt, i'm proud of every move and risk i take
We learn to speak with words, so we can bound some eyes like ricochet
'cause every new idea has got us lighten up like cityscape**

{chorus}

**May have been lost, but now we've been found
Finding a footing with drops on the ground
Keep our heads up, and we can stay proud
Never stop dreaming on
Show what we've got and keep our words loud
Climbing our way up and not looking down
We can not stop, you hearing our sound
Never stop dreaming on**

{verse 2}

Uh, and every loss becomes the lesson, i've been sweating, i can't answer e
very question

Like i'm sisyphus i'm giving this my all with no progression

I'm excited to be running, but regretting every session

If you're beating up yourself, there's time that's wasting on the presence

So you make the choice to plant the seed, then all this is a part of me

They say we forging source, but i'll be making the whole armory

And every work you think is batten up, it causes masterpiece

I'm grateful for my life since the day i choked on my calories

I'm turning the page, so i'm reading, uh

Words fulling down like the paper is bleeding

Let us be gains to our feelings, uh

Tapestry taking the spec different meanings

I may be short, but i'm breaking the ceiling

Too many things that i've witnessed of dreaming

Music i make is a face for my healing

And i'm not afraid to put faith in my dreaming

{chorus}

May have been lost, but now we've been found

Finding a footing with drops on the ground

Keep our heads up, and we can stay proud

Never stop dreaming on

Show what we've got and keep our words loud

Climbing our way up and not looking down

We can not stop, you hearing our sound

Never stop dreaming on

{bridge}

I feel so lonely in my own head

My mind's a poison and it's begging for a slow death

All i feel is guilt for my success, but i don't know best

I have to keep on working, so i find out where i'll go next

We rising up a mountains, and our dreams are send us to the stars

**Even if our purpose is discovering just who we are
We're in this together, so we can't forget to do our part
We're bound by flesh and blood that keeps on beating through our human hearts**

{chorus}

**May have been lost, but now we've been found
Finding a footing with drops on the ground
Keep our heads up, and we can stay proud
Never stop dreaming on**

**May have been lost, but now we've been found
Finding a footing with drops on the ground
Keep our heads up, and we can stay proud
Never stop dreaming on**

**Show what we've got and keep our words loud
Climbing our way up and not looking down
We can not stop, you hearing our sound
Never stop dreaming on**
