

Kon Kan - I Beg Your Pardon

Here we go

**There once was a time and there once was a way
We had something going and to my dismay
Attention to me seemed to drift though I don't know where**

**And when we're alone seems there's nothing to say
I bring up a topic and you push it away
You say that you do but I think it's just you don't care
Why do I feel you're using me
Are we an item or are we just two
I need some commitments all I ask of you
Your lifestyle can change
Don't be 'fraid what you think's in store**

**I know what's on your mind you've got lots to lose
Your shallow acquaintances what's there to choose
Yuo won't get too deep even though I'm worth so much more**

So think about it carefully

**Smile for a while and let's be jolly
Love shouldn't be so melancholy
Come along and share the good times while we can**

**Do you want to hustle?
Do you want to salsa?**

**Do you want to hustle?
Do you want to salsa?**

**If that's how you want it; that's how it'll be
There's no use in trying or making you see
That love don't come easy you don't know what it's about**

**To get things together won't take any pain
Don't need to see/hear from you ever again
From this day on listen but no more
Please count me out, and you know what I'm talkin' about
Smile for a while and let's be jolly
Love shouldn't be so melancholy
Come along and share the good times while we can**

**I know now's the time that I went to find something new
You know it's your crime that I'm out to find someone too**
